

Software training

Radtherm

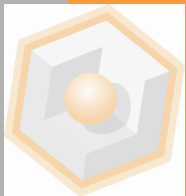

RadTherm Introductory Course 2 days

Price: 1.500 Euro

Pre requisite: No previous knowledge about RadTherm is required.

The Course addresses the following topics:

- Geometry
- Review meshing problems and solutions
- Create and manipulate geometry
- Setup transient thermal solution
- Import geometry
- Solver Parameters
- Set up Conduction between different part types
- Use results from previous run
- Use 1D fluid flow
- Natural Environment
- Simulate solar loading
- Restart use result from a previous run and continue transient
- CFD Coupling
- Mesh mapping and interpolate part type
- Use solid meshes for conduction of solid material
- Thermal links face-to-face conduction
