

GOVIRTUAL

Systemadministratör Windows High Performance Computing

Go Virtual is a leading supplier of High Performance Computing Systems in northern Europe. We are certified HP Preferred Partner Gold and specialized within HPC.

For on-site assignment at one of our customers we are looking for a systems administrator to maintain and further develop an expanding HPC environment based on HP blade servers, Microsoft Windows CCS and HPC server 2008 operating systems.

Responsibilities includes:

- Daily operation and hardware support
- Configuration and change management
- Development and expansion of the HPC environment

Experience from Windows environments is mandatory, experience from enterprise level operation of servers, storage and network is beneficial for the applicant, any experience from InfiniBand networks and Linux is regarded to be a merit.

The job location is Lund, Sweden.
